

FALL SEMESTER 2009

Tuesday Noon Seminars Room 168 Plant Biology Building

REVISED

Date	Speaker	Title
Sept 8	Malali Gowda (Buell)	"G-capped and polyadenylated small RNAs associate with transcription termini"
Sept 15	Mintu Desai (Hu)	"A role for the RING finger domain of the peroxisomal membrane protein PEX2 in photomorphogenesis in <i>Arabidopsis</i> "
Sept 22	Yan Lu (Last)	"The role of a small zinc finger-containing membrane protein in photoprotection in <i>Arabidopsis</i> "
Sept 29	Hong Luo (Walton)	"Biosynthesis and cellular localization of <i>Amanita</i> toxins"
Oct 6	Markus Gunl (Pauly)	"Glycoside hydrolases involved in hemicellulose metabolism"
Oct 13	Kyaw Aung (Hu)	"Functional characterization of an <i>Arabidopsis</i> C-terminal tail-anchored protein in peroxisome and mitochondrial division"
Oct 20	Bagmi Pattanaik (Montgomery)	"FdTonB is involved in the photoregulation of cellular morphology during complementary chromatic adaptation in <i>Fremyella diplosiphon</i> "
Oct 27	Goutami Banerjee (Walton)	"Deconstructing the plant cell wall: biomass enzymes from fungi"
Nov 3	Alexandre Brutus (He)	"Characterization of the first cell wall sensing receptor involved in plant/pathogen interactions"
Nov 10	Pingfang Yang (Hu)	"Proteomic identification of novel peroxisomal proteins and functional characterization of the peroxisomal histidine triad family proteins in <i>Arabidopsis</i> "
Nov 17	Laurent Mene Saffrane (DellaPenna)	"Tocochromanol biosynthetic pathway in plants"
Nov 24	Carmen Faso (Brandizzi)	"Exploring the integrity of the plant endomembrane system"
Dec 1	Christine Shyu (Howe)	"Understanding the molecular mechanism of JAZ8 in the jasmonate signaling pathway in <i>Arabidopsis</i> "
Dec 8	Chunjie Tian (Shachar-Hill)	"Metabolism and transfer of nitrogen in the arbuscular mycorrhizal symbiosis"

*Sponsored by PLB graduate students

**Sponsored by PRL graduate students
